

## Winchendon Landfill Site Observation – July 24, 2023

**To:** Brian Croteau, DPW Director  
**FROM:** Aaron Sabbs, PE, Tighe & Bond  
**COPY:** Alex Fagnand, PE, Tighe & Bond  
**DATE:** September 11, 2023

---

On July 24, 2023, Aaron Sabbs from Tighe & Bond visited the Winchendon Landfill (hereby referred to as the "Site") to monitor the grading and shaping activities of the Landfill Closure Project. The Site, which is located at 580 River Street, is the former Mabardy Landfill. It is owned and operated by W.L. French Corporation (Operator) as the Winchendon Landfill. As part of the Landfill Closure Project, the Massachusetts Department of Environmental Protection (MassDEP) has permitted the acceptance of up to 415,000 cubic yards of COMM 97-001 material as defined by MassDEP Policy. A Minor Modification of Existing Landfill was approved by MassDEP May 5, 2023 which increased the permitted maximum volume to 480,000 cubic yards. In accordance with Condition 13 of the Landfill Closure Agreement between the Town and the Operator, the Site was reviewed for compliance with the following documents:

- Corrective Action Design permit approval issued on September 23, 2020 and Corrective Action Design Plans prepared by Langdon Environmental, LLC, dated June 2019 and revised October 2019.
- Initial Operations Plan, by Langdon Environmental, LLC, dated January 2021, revised to include temporary rip rap settling area.

### Landfill Operations

General landfill operations appeared to comply with best practices and the Corrective Action Design. While on site, material was placed and spread by bulldozer in the general area of Section B-B of Sheet C-5 of the Corrective Action Design, within the limits designated for initial placement. These areas have been graded and gravel has been placed to allow truck access as the elevation in these areas increases. The access road on the east side of the site has been raised to allow access to the northern part of the site.

### Stormwater and Erosion

Stormwater conveyances have been constructed per the Initial Operations Plan as revised to include a temporary rip rap settling area. This plan was submitted to MassDEP under a Major Permit Modification (BWP SQ 11). A swale, including check dams, has been constructed from the temporary stormwater basin to the temporary settling area. Overflow from the temporary stormwater basin runs to the settling area with a PVC drainage pipe running beneath the access road. The swale from the northern section of the site to the temporary stormwater basin has not yet been constructed.

As the landfill's footprint has grown, portions of the swale at the toe of the slope have been filled, reducing the length of the swale. The PVC drainage pipe was also previously broken when additional rip rap was placed and has not been repaired.

Sediment that had previously built up against the erosion control at the base of the southwestern slope has recently been removed and a berm has been created to slow the flow of water before it reaches the erosion control. This area has seen repeated issues due to erosion on the slope and will require continued monitoring and maintenance.

Vegetation on the hydroseeded slopes has grown in inconsistently and there are several areas where erosion has caused rills and gullies to form.

**Material Accepted**

Tighe & Bond reviewed the attached Net Daily Summary Report received for the month of July, which details the total tonnage and number of loads of material received by the facility. As indicated in the attached Table 1, a total of 19,323 tons of material was received in July, which results in 83,446 tons remaining of the total 912,000 tons permitted. Based on a utilization factor of 1.9 tons per cubic yard of soil, the total volume received in July was 10,170 cubic yards, which results in 43,919.02 cubic yards remaining. This represents about 9% of the total permitted volume remaining based on the updated BWP SW 22 permit.

The DEP permit limits the number of loads received to 64 per day without special Town permission. There were no days in July in which the number of loads received was greater than 64.

Enclosed are photographs summarizing the items observed during the site visit, and Table 1, which notes the monthly summary of material accepted.

*Photo 1 – Eastern slope and access road, looking north.*

*Photo 2 – Raised access road at the base of the eastern slope.*

*Photo 3 –Material placed and graded at the center of the Site with grading for truck access*

*Photo 4 – Southwestern slope with sediment accumulating against the erosion control.*
