

## **Winchendon Landfill Site Observation – April 28, 2023**

**TO:** Brian Croteau, DPW Director  
**FROM:** Aaron Sabbs, PE, Tighe & Bond  
**COPY:** Alex Fagnand, PE, Tighe & Bond  
**DATE:** May 31, 2023

---

On April 28, 2023, Aaron Sabbs from Tighe & Bond visited the Winchendon Landfill (hereby referred to as the "Site") to monitor the grading and shaping activities of the Landfill Closure Project. The Site, which is located at 580 River Street, is the former Mabardy Landfill. It is owned and operated by W.L. French Corporation (Operator) as the Winchendon Landfill. As part of the Landfill Closure Project, the Massachusetts Department of Environmental Protection (MassDEP) has permitted the acceptance of up to 415,000 cubic yards of COMM 97-001 material as defined by MassDEP Policy. A Minor Modification of Existing Landfill was approved by MassDEP May 5, 2023 which increased the permitted maximum volume to 480,000 cubic yards. In accordance with Condition 13 of the Landfill Closure Agreement between the Town and the Operator, the Site was reviewed for compliance with the following documents:

- Corrective Action Design permit approval issued on September 23, 2020 and Corrective Action Design Plans prepared by Langdon Environmental, LLC, dated June 2019 and revised October 2019.
- Initial Operations Plan, by Langdon Environmental, LLC, dated January 2021, revised to include temporary rip rap settling area.

### **Landfill Operations**

General landfill operations appeared to comply with best practices and the Corrective Action Design. While on site, material was placed and spread by bulldozer in the general area of Sections B-B and C-C of Sheet C-5 of the Corrective Action Design, within the limits designated for initial placement. These areas have been graded and gravel has been placed to allow truck access as the elevation in these areas increases. The access road on the east side of the site has been rebuilt over fill to allow access to the northern part of the site.

### **Stormwater and Erosion**

Stormwater conveyances have been constructed per the Initial Operations Plan as revised to include a temporary rip rap settling area. This plan was submitted to MassDEP under a Major Permit Modification (BWP SQ 11). A swale, including check dams, has been constructed from the temporary stormwater basin to the temporary settling area. Overflow from the temporary stormwater basin runs to the settling area with a PVC drainage pipe running beneath the access road. The swale from the northern section of the site to the temporary stormwater basin has not yet been constructed.

It appears that fill has been placed in the swale to allow construction equipment to cross it. Additional fill has also been placed as the footprint has grown. The fill is preventing water from flowing through the swale to the settling area. The PVC drainage pipe was also previously broken when additional rip rap was placed and has not been repaired.

Erosion on the southwestern slope has caused an accumulation of sediment at the base of the slope. The sediment in this area should be removed before it overtops the erosion control at the limit of work. The silt fence in this area appears to be damaged and should be repaired.

Hydroseed was applied to the landfill's slopes in late fall. However, the seed does not appear to have germinated, and rainfall has caused erosion throughout the slopes, including large gullies in some locations. Recent snowmelt has exacerbated this issue. Rainwater has accumulated at the base of the southwestern slope, with a large amount of standing water at the erosion control barrier, which appears to be in danger of overtopping. Runoff from the eastern slope has also caused a large buildup of water on the temporary access road, rendering it impassible.

These stormwater issues appear to have gotten worse in the recent past and remain unchanged since the previous visits. The late season hydroseed did not germinate and the slopes have eroded. We recommend that remedial action be taken to provide temporary stabilization measures on the slope and maintain the swales and all BMPs at the toe of the slope to remove the standing water and to ensure that the silt and sediment does not travel beyond the limit of the project. While we have observed and noted these issues, Tighe & Bond is not acting as the Stormwater Pollution Prevention Plan (SWPPP) inspector on site.

**Material Accepted**

Tighe & Bond reviewed the attached Net Daily Summary Report received for the month of April, which details the total tonnage and number of loads of material received by the facility. As indicated in the attached Table 1, a total of 16,433.86 tons of material was received in April, which results in 135,952.19 tons remaining of the total 912,000 tons permitted. Based on a utilization factor of 1.9 tons per cubic yard of soil, the total volume received in April was 8,649.40 cubic yards, which results in 71,553.78 cubic yards remaining. This represents about 15% of the total permitted volume remaining based on the updated BWP SW 22 permit.

The DEP permit limits the number of loads received to 64 per day without special Town permission. There were no days in April in which the number of loads received was greater than 64.

Enclosed are photographs summarizing the items observed during the site visit, and Table 1, which notes the monthly summary of material accepted.

May 15, 2023

James A. McQuade, Section Chief  
Solid Waste Management Program  
MassDEP Central Regional Office  
8 New Bond Street  
Worcester, Massachusetts 01606

Subject: Monthly Reporting – April 2023  
Permit No. X283688  
Former Mabardy Landfill  
River Street in Winchendon, Massachusetts  
CEC Project No: 306-000

Dear Mr. McQuade:

Civil & Environmental Consultants, Inc. (CEC) presents this letter to fulfill the monthly reporting and recordkeeping requirements at the above referenced landfill (hereby referred to as the “Site”). This submittal was prepared in accordance with Section E of the Specific Permit Conditions as described in the Permit Number X283688 (CAD permit approval) in order to document tonnage received in the past month and any operational problems or deficiencies encountered in the Project.

## **1.0 MATERIAL ACCEPTED**

W.L. French began to import approved soils for shaping and grading at the Site on January 19, 2021 in accordance with the CAD permit approval issued on September 23, 2020. A summary table showing the tonnage of material accepted at the Landfill over the previous month and cumulative yardage and tonnage of material accepted is provided with this letter. Following the approval of the May 5, 2023, BWP SW 22 *Minor Modification of an Existing Landfill*, A total of 912,000 tons are permitted for the facility. As presented in the attached summary, 16,433.86 tons (8,649.40 cubic yards) were received by the facility in April 2023 which results in 135,952.19 tons (71,553.78 cubic yards) remaining.

## **2.0 OPERATIONAL MODIFICATIONS**

During the initial test pitting within the northern permitted stormwater basin footprint, groundwater elevations were detected at higher elevations than the bottom elevation of the permitted basin. Therefore, a stormwater basin redesign was required to allow the stormwater management system to function as originally intended. A temporary basin was installed in the same general vicinity and a permanent stormwater redesign was prepared and submitted to

MassDEP under a Major Permit Modification (BWP SW 11) on September 6, 2022. The permanent stormwater basin design was approved for an amended Order of Conditions by the Winchendon Conservation Commission at a public hearing on June 9, 2022.

A Test Pit Summary Report was issued to MassDEP on November 15, 2022 that summarized the results of the test pit investigation performed by CEC personnel on October 17th and 19th, 2022 (Auth. # SW45-0000182). Observations of the test pit investigation were included in the Test Pit Summary Report that provided a 'Proposed Limit of Final Cap' and redesigned the limit of waste based on the observations of the test pit investigation.

In April 2023, CEC prepared and applied for a BWP SW22 *Minor Modification of an Existing Landfill* that detailed proposed modifications to the previously permitted and approved final closure conditions. The BWP SW22 Minor Modification was approved with a Permit Issuance Date of May 5, 2023. This approved modification authorized an additional 65,000 cubic yards, or 123,500 tons, of grading and shaping material at the Landfill in order to achieve the final approved grades.

Please do not hesitate to contact either of us with any questions or comments regarding the work performed.

Sincerely,

CIVIL & ENVIRONMENTAL CONSULTANTS, INC.

Michael P. Avila
