Re: Lincoln Solar Project Glare
Date: March 10, 2020

Last fall the Board had conversations with Anthony Kurylo of Northern Heights Drive regarding glare on his property following construction of the Lincoln Avenue Solar project by Dynamic Energy. John Perry of Dynamic Energy attended meetings and visited the site as well to understand the concerns. Per the minutes from November 19, 2019 the consensus was that there was no clear solution and that Mr. Kurylo would return in the spring should the glare return. I received an email this morning stating that indeed the glare has returned.

The project was built in compliance with the permits and conditions approved by the Planning Board. As this is the case I do not believe that the Planning Board has any jurisdiction over this issue or possible resolutions. With this memo I am asking that the Planning Board discuss this topic and formally vote to that effect if the majority of the Board agrees.
