<sup>\*</sup> Some projects **not** in Estimated Habitat may be located in Priority Habitat, and require NHESP review (see <a href="http://www.mass.gov/eea/agencies/dfg/dfw/natural-heritage/regulatory-review/">http://www.mass.gov/eea/agencies/dfg/dfw/natural-heritage/regulatory-review/</a>). Priority Habitat includes habitat for state-listed plants and strictly upland species not protected by the Wetlands Protection Act.

<sup>\*\*</sup> MESA projects may not be segmented (321 CMR 10.16). The applicant must disclose full development plans even if such plans are not required as part of the Notice of Intent process.

| -     | City/Town                   |

### F. Signatures and Submittal Requirements

I hereby certify under the penalties of perjury that the foregoing Notice of Intent and accompanying plans, documents, and supporting data are true and complete to the best of my knowledge. I understand that the Conservation Commission will place notification of this Notice in a local newspaper at the expense of the applicant in accordance with the wetlands regulations, 310 CMR 10.05(5)(a).

I further certify under penalties of perjury that all abutters were notified of this application, pursuant to the requirements of M.G.L. c. 131, § 40. Notice must be made by Certificate of Mailing or in writing by hand delivery or certified mail (return receipt requested) to all abutters within 100 feet of the property line of the project location.

|  | 6-19-23  |
| Faul Grasuwa 5. Signature of Representative (Fany) | 6. Date  |

#### For Conservation Commission:

Two copies of the completed Notice of Intent (Form 3), including supporting plans and documents, two copies of the NOI Wetland Fee Transmittal Form, and the city/town fee payment, to the Conservation Commission by certified mail or hand delivery.

#### For MassDEP:

One copy of the completed Notice of Intent (Form 3), including supporting plans and documents, one copy of the NOI Wetland Fee Transmittal Form, and a **copy** of the state fee payment to the MassDEP Regional Office (see Instructions) by certified mail or hand delivery.

#### Other:

If the applicant has checked the "yes" box in any part of Section C, Item 3, above, refer to that section and the Instructions for additional submittal requirements.

The original and copies must be sent simultaneously. Failure by the applicant to send copies in a timely manner may result in dismissal of the Notice of Intent.

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

#### B. Fees

Fee should be calculated using the following process & worksheet. *Please see Instructions before filling out worksheet.* 

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

**Step 4/Subtotal Activity Fee:** Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.

**Step 6/Fee Payments:** To calculate the state share of the fee, divide the total fee in half and subtract \$12.50. To calculate the city/town share of the fee, divide the total fee in half and add \$12.50.

### C. Submittal Requirements

a.) Complete pages 1 and 2 and send with a check or money order for the state share of the fee, payable to the Commonwealth of Massachusetts.

Department of Environmental Protection Box 4062 Boston, MA 02211

b.) **To the Conservation Commission:** Send the Notice of Intent or Abbreviated Notice of Intent; a **copy** of this form; and the city/town fee payment.

**To MassDEP Regional Office** (see Instructions): Send a copy of the Notice of Intent or Abbreviated Notice of Intent; a **copy** of this form; and a **copy** of the state fee payment. (E-filers of Notices of Intent may submit these electronically.)

#### AFFIDAVIT OF SERVICE

Under the Massachusetts Wetlands Protection Act

(to be submitted to the Massachusetts Department of Environmental Protection and the Conservation Commission when filing a Notice of Intent)

I, Paul F. Grasewicz, hereby certify under the pains and penalties of perjury that on June 20, 2023 I gave notification to abutters in compliance with the second paragraph of Massachusetts General Laws Chapter 131, Section 40, and the DEP Guide to Abutter Notification dated April 8, 1994, in connection with the following matter:

A Notice of Intent filed under the Massachusetts Wetlands Protection Act by Asher Construction, LLC with the Winchendon Conservation Commission on June 19, 2023 for property located at Doyle Road (Map-8 Parcel-240); Winchendon, MA. The form of the notification, and a list of the abutters to whom it was given are attached to this Affidavit of Service.

## Notification to Abutters Under the Massachusetts Wetlands Protection Act

In accordance with the second paragraph Massachusetts General Laws Chapter 131, Section 40, you are hereby notified of the following.

- A. The name of the applicant is Asher Construction, LLC
- B. The applicant has filed a Notice of Intent with the Conservation Commission for the municipality of <u>Winchendon</u> seeking permission to remove, fill, dredge or alter an Area Subject to Protection under the Wetlands Protection Act (General Laws Chapter 131, Section 40). Specifically, the construction of a single-family dwelling within the 100' buffer zone of a wetland with all grading for the house being outside of the 50' local no-disturb zone.
- C. The address of the lot where the activity is proposed is <u>Doyle Avenue</u>; <u>Winchendon</u>, <u>MA (Map-8 Lot-240)</u>
- D. Copies of the Notice of Intent may be examined at <u>GRAZ Engineering LLC</u>, <u>323 West Lake Road</u>, <u>Fitzwilliam</u>, <u>NH 03447</u> between the hours of 8am and 4 pm Monday through Friday by appointment only. For copies call 603-585-6959.
- E. Information regarding the date, time, and place of the public hearing may be obtained from the <u>Winchendon Conservation Commission</u> by checking the town website's meeting/agenda list or by calling <u>Matthew Marro</u> at 978-314-7858.
- F. Notice of public hearing, including date, time, and place, will be published in the newspaper at least 5 days in advance of the hearing.

Note: Notice of the public hearing, including its date, time, and location will be posted in the city or town hall not less than forty-eight hours in advance of hearing. At this time, the hearing is planned for July 13, 2023, at 6:00 P.M. Please verify if interested.

Note: You may also contact your local Conservation Commission or the nearest Department of Environmental Protection Regional Office for more information about this application or the Wetlands Protection Act. To contact DEP, call:

Central Region: 508-792-7650 Northeast Region: 617-654-6500 Southeast Region: 508-946-2700 Western Region: 413-784-1100

## **Checklist for Stormwater Report**

#### A. Introduction

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

A Stormwater Report must be submitted with the Notice of Intent permit application to document compliance with the Stormwater Management Standards. The following checklist is NOT a substitute for the Stormwater Report (which should provide more substantive and detailed information) but is offered here as a tool to help the applicant organize their Stormwater Management documentation for their Report and for the reviewer to assess this information in a consistent format. As noted in the Checklist, the Stormwater Report must contain the engineering computations and supporting information set forth in Volume 3 of the Massachusetts Stormwater Handbook. The Stormwater Report must be prepared and certified by a Registered Professional Engineer (RPE) licensed in the Commonwealth.

The Stormwater Report must include:

- The Stormwater Checklist completed and stamped by a Registered Professional Engineer (see page 2) that certifies that the Stormwater Report contains all required submittals. This Checklist is to be used as the cover for the completed Stormwater Report.
- Applicant/Project Name
- Project Address
- Name of Firm and Registered Professional Engineer that prepared the Report
- Long-Term Pollution Prevention Plan required by Standards 4-6
- Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan required by Standard 8<sup>2</sup>
- Operation and Maintenance Plan required by Standard 9

In addition to all plans and supporting information, the Stormwater Report must include a brief narrative describing stormwater management practices, including environmentally sensitive site design and LID techniques, along with a diagram depicting runoff through the proposed BMP treatment train. Plans are required to show existing and proposed conditions, identify all wetland resource areas, NRCS soil types, critical areas, Land Uses with Higher Potential Pollutant Loads (LUHPPL), and any areas on the site where infiltration rate is greater than 2.4 inches per hour. The Plans shall identify the drainage areas for both existing and proposed conditions at a scale that enables verification of supporting calculations.

As noted in the Checklist, the Stormwater Management Report shall document compliance with each of the Stormwater Management Standards as provided in the Massachusetts Stormwater Handbook. The soils evaluation and calculations shall be done using the methodologies set forth in Volume 3 of the Massachusetts Stormwater Handbook.

To ensure that the Stormwater Report is complete, applicants are required to fill in the Stormwater Report Checklist by checking the box to indicate that the specified information has been included in the Stormwater Report. If any of the information specified in the checklist has not been submitted, the applicant must provide an explanation. The completed Stormwater Report Checklist and Certification must be submitted with the Stormwater Report.

<sup>&</sup>lt;sup>1</sup> The Stormwater Report may also include the Illicit Discharge Compliance Statement required by Standard 10. If not included in the Stormwater Report, the Illicit Discharge Compliance Statement must be submitted prior to the discharge of stormwater runoff to the post-construction best management practices.

<sup>&</sup>lt;sup>2</sup> For some complex projects, it may not be possible to include the Construction Period Erosion and Sedimentation Control Plan in the Stormwater Report. In that event, the issuing authority has the discretion to issue an Order of Conditions that approves the project and includes a condition requiring the proponent to submit the Construction Period Erosion and Sedimentation Control Plan before commencing any land disturbance activity on the site.

Bureau of Resource Protection - Wetlands Program

## **Checklist for Stormwater Report**

### B. Stormwater Checklist and Certification

The following checklist is intended to serve as a guide for applicants as to the elements that ordinarily need to be addressed in a complete Stormwater Report. The checklist is also intended to provide conservation commissions and other reviewing authorities with a summary of the components necessary for a comprehensive Stormwater Report that addresses the ten Stormwater Standards.

Note: Because stormwater requirements vary from project to project, it is possible that a complete Stormwater Report may not include information on some of the subjects specified in the Checklist. If it is determined that a specific item does not apply to the project under review, please note that the item is not applicable (N.A.) and provide the reasons for that determination.

A complete checklist must include the Certification set forth below signed by the Registered Professional Engineer who prepared the Stormwater Report.

### Registered Professional Engineer's Certification

I have reviewed the Stormwater Report, including the soil evaluation, computations, Long-term Pollution Prevention Plan, the Construction Period Erosion and Sedimentation Control Plan (if included), the Long-term Post-Construction Operation and Maintenance Plan, the Illicit Discharge Compliance Statement (if included) and the plans showing the stormwater management system, and have determined that they have been prepared in accordance with the requirements of the Stormwater Management Standards as further elaborated by the Massachusetts Stormwater Handbook. I have also determined that the information presented in the Stormwater Checklist is accurate and that the information presented in the Stormwater Report accurately reflects conditions at the site as of the date of this permit application.

Signature and Date 10-25-22

#### Checklist

| <b>Project Type:</b> Is the application for new development, redevelopment, or a mix of new and redevelopment? |
|--|
|  |
| Redevelopment  |
| Mix of New Development and Redevelopment   |

## **Checklist for Stormwater Report**

### Checklist (continued)

| env         | <b>Measures:</b> Stormwater Standards require LID measures to be considered. Document what rironmentally sensitive design and LID Techniques were considered during the planning and design of project: |
|-------------|---|
|             | No disturbance to any Wetland Resource Areas  |
|             | Site Design Practices (e.g. clustered development, reduced frontage setbacks)   |
|             | Reduced Impervious Area (Redevelopment Only)  |
|             | Minimizing disturbance to existing trees and shrubs   |
|             | LID Site Design Credit Requested:   |
|             | ☐ Credit 1  |
|             | ☐ Credit 2  |
|             | ☐ Credit 3  |
| $\boxtimes$ | Use of "country drainage" versus curb and gutter conveyance and pipe  |
|             | Bioretention Cells (includes Rain Gardens)  |
|             | Constructed Stormwater Wetlands (includes Gravel Wetlands designs)  |
|             | Treebox Filter  |
|             | Water Quality Swale   |
|             | Grass Channel   |
|             | Green Roof  |
|             | Other (describe):   |
|             |   |
| Sta         | ndard 1: No New Untreated Discharges  |
| $\boxtimes$ | No new untreated discharges   |
|             | Outlets have been designed so there is no erosion or scour to wetlands and waters of the Commonwealth   |
| $\boxtimes$ | Supporting calculations specified in Volume 3 of the Massachusetts Stormwater Handbook included.  |

Bureau of Resource Protection - Wetlands Program

## **Checklist for Stormwater Report**

Checklist (continued) Standard 2: Peak Rate Attenuation Standard 2 waiver requested because the project is located in land subject to coastal storm flowage and stormwater discharge is to a wetland subject to coastal flooding. Evaluation provided to determine whether off-site flooding increases during the 100-year 24-hour storm. Calculations provided to show that post-development peak discharge rates do not exceed predevelopment rates for the 2-year and 10-year 24-hour storms. If evaluation shows that off-site flooding increases during the 100-year 24-hour storm, calculations are also provided to show that post-development peak discharge rates do not exceed pre-development rates for the 100-year 24hour storm. Standard 3: Recharge Soil Analysis provided. Required Recharge Volume calculation provided. Required Recharge volume reduced through use of the LID site Design Credits. Sizing the infiltration, BMPs is based on the following method: Check the method used. Static

 Simple Dynamic Dynamic Field<sup>1</sup> Runoff from all impervious areas at the site discharging to the infiltration BMP. Runoff from all impervious areas at the site is *not* discharging to the infiltration BMP and calculations are provided showing that the drainage area contributing runoff to the infiltration BMPs is sufficient to generate the required recharge volume. Recharge BMPs have been sized to infiltrate the Required Recharge Volume. Recharge BMPs have been sized to infiltrate the Required Recharge Volume *only* to the maximum extent practicable for the following reason: Site is comprised solely of C and D soils and/or bedrock at the land surface ☐ M.G.L. c. 21E sites pursuant to 310 CMR 40.0000 Solid Waste Landfill pursuant to 310 CMR 19.000 Project is otherwise subject to Stormwater Management Standards only to the maximum extent practicable. Calculations showing that the infiltration BMPs will drain in 72 hours are provided. Property includes a M.G.L. c. 21E site or a solid waste landfill and a mounding analysis is included.

<sup>&</sup>lt;sup>1</sup> 80% TSS removal is required prior to discharge to infiltration BMP if Dynamic Field method is used.

Bureau of Resource Protection - Wetlands Program

## **Checklist for Stormwater Report**

| Checklist (continued)            |   |  |
|----------------------------------|---|--|
| Standard 3: Recharge (continued) |   |  |
|                                  | The infiltration BMP is used to attenuate peak flows during storms greater than or equal to the 10-year 24-hour storm and separation to seasonal high groundwater is less than 4 feet and a mounding analysis is provided.  |  |
|                                  | Documentation is provided showing that infiltration BMPs do not adversely impact nearby wetland resource areas.   |  |
| Sta                              | ndard 4: Water Quality  |  |
| The                              | Long-Term Pollution Prevention Plan typically includes the following:<br>Good housekeeping practices;   |  |
| •                                | Provisions for storing materials and waste products inside or under cover;<br>Vehicle washing controls;   |  |
| •                                | Requirements for routine inspections and maintenance of stormwater BMPs; Spill prevention and response plans; Provisions for maintenance of lawns, gardens, and other landscaped areas; Requirements for storage and use of fertilizers, herbicides, and pesticides; Pet waste management provisions; Provisions for operation and management of septic systems; Provisions for solid waste management; Snow disposal and plowing plans relative to Wetland Resource Areas; Winter Road Salt and/or Sand Use and Storage restrictions; Street sweeping schedules; |  |
| •                                | Provisions for prevention of illicit discharges to the stormwater management system;  Documentation that Stormwater BMPs are designed to provide for shutdown and containment in the event of a spill or discharges to or near critical areas or from LUHPPL;  Training for staff or personnel involved with implementing Long-Term Pollution Prevention Plan;  List of Emergency contacts for implementing Long-Term Pollution Prevention Plan.  |  |
|                                  | A Long-Term Pollution Prevention Plan is attached to Stormwater Report and is included as an attachment to the Wetlands Notice of Intent.  Treatment BMPs subject to the 44% TSS removal pretreatment requirement and the one inch rule for calculating the water quality volume are included, and discharge:   |  |
|                                  | is within the Zone II or Interim Wellhead Protection Area   |  |
|                                  | is near or to other critical areas  |  |
|                                  | is within soils with a rapid infiltration rate (greater than 2.4 inches per hour)   |  |
|                                  | involves runoff from land uses with higher potential pollutant loads.   |  |

☐ The Required Water Quality Volume is reduced through use of the LID site Design Credits.

applicable, the 44% TSS removal pretreatment requirement, are provided.

☐ Calculations documenting that the treatment train meets the 80% TSS removal requirement and, if

Checklist (continued)

## **Checklist for Stormwater Report**

| Sta         | ndard 4: Water Quality (continued)   |
|-------------|--|
| $\boxtimes$ | The BMP is sized (and calculations provided) based on:   |
|             | ☐ The ½" or 1" Water Quality Volume or   |
|             | ☐ The equivalent flow rate associated with the Water Quality Volume and documentation is provided showing that the BMP treats the required water quality volume.   |
|             | The applicant proposes to use proprietary BMPs, and documentation supporting use of proprietary BMP and proposed TSS removal rate is provided. This documentation may be in the form of the propriety BMP checklist found in Volume 2, Chapter 4 of the Massachusetts Stormwater Handbook and submitting copies of the TARP Report, STEP Report, and/or other third party studies verifying performance of the proprietary BMPs. |
|             | A TMDL exists that indicates a need to reduce pollutants other than TSS and documentation showing that the BMPs selected are consistent with the TMDL is provided.   |
| Sta         | ndard 5: Land Uses With Higher Potential Pollutant Loads (LUHPPLs)   |
|             | The NPDES Multi-Sector General Permit covers the land use and the Stormwater Pollution Prevention Plan (SWPPP) has been included with the Stormwater Report.  The NPDES Multi-Sector General Permit covers the land use and the SWPPP will be submitted <i>prior</i> to the discharge of stormwater to the post-construction stormwater BMPs.  |
|             | The NPDES Multi-Sector General Permit does <i>not</i> cover the land use.  |
|             | LUHPPLs are located at the site and industry specific source control and pollution prevention measures have been proposed to reduce or eliminate the exposure of LUHPPLs to rain, snow, snow melt and runoff, and been included in the long term Pollution Prevention Plan.  |
|             | All exposure has been eliminated.  |
|             | All exposure has <i>not</i> been eliminated and all BMPs selected are on MassDEP LUHPPL list.  |
|             | The LUHPPL has the potential to generate runoff with moderate to higher concentrations of oil and grease (e.g. all parking lots with >1000 vehicle trips per day) and the treatment train includes an oil grit separator, a filtering bioretention area, a sand filter or equivalent.  |
| Sta         | ndard 6: Critical Areas  |
|             | The discharge is near or to a critical area and the treatment train includes only BMPs that MassDEP has approved for stormwater discharges to or near that particular class of critical area.  |
|             | Critical areas and BMPs are identified in the Stormwater Report.   |

Bureau of Resource Protection - Wetlands Program

## **Checklist for Stormwater Report**

### Checklist (continued)

Standard 7: Redevelopments and Other Projects Subject to the Standards only to the maximum extent practicable

| The project is subject to the Stormwater Management Standards only to the maximum Extent Practicable as a:  |
|---|
| ☐ Limited Project   |
| <ul> <li>Small Residential Projects: 5-9 single family houses or 5-9 units in a multi-family development provided there is no discharge that may potentially affect a critical area.</li> <li>Small Residential Projects: 2-4 single family houses or 2-4 units in a multi-family development with a discharge to a critical area</li> <li>Marina and/or boatyard provided the hull painting, service and maintenance areas are protected from exposure to rain, snow, snow melt and runoff</li> </ul>                |
| ☐ Bike Path and/or Foot Path  |
| Redevelopment Project   |
| Redevelopment portion of mix of new and redevelopment.  |
| Certain standards are not fully met (Standard No. 1, 8, 9, and 10 must always be fully met) and an explanation of why these standards are not met is contained in the Stormwater Report.  |
| The project involves redevelopment and a description of all measures that have been taken to improve existing conditions is provided in the Stormwater Report. The redevelopment checklist found in Volume 2 Chapter 3 of the Massachusetts Stormwater Handbook may be used to document that the proposed stormwater management system (a) complies with Standards 2, 3 and the pretreatment and structural BMP requirements of Standards 4-6 to the maximum extent practicable and (b) improves existing conditions. |

#### Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control

A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan must include the following information:

- Narrative;
- Construction Period Operation and Maintenance Plan;
- Names of Persons or Entity Responsible for Plan Compliance;
- Construction Period Pollution Prevention Measures;
- Erosion and Sedimentation Control Plan Drawings;
- Detail drawings and specifications for erosion control BMPs, including sizing calculations;
- Vegetation Planning;
- Site Development Plan;
- Construction Sequencing Plan;
- Sequencing of Erosion and Sedimentation Controls;
- Operation and Maintenance of Erosion and Sedimentation Controls;
- Inspection Schedule;
- Maintenance Schedule;
- Inspection and Maintenance Log Form.
- A Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan containing the information set forth above has been included in the Stormwater Report.

## **Checklist for Stormwater Report**

Checklist (continued)

| Standard 8: Construction Period Pollution Prevention and Erosion and Sedimentation Control (continued) |   |  |  |
|--|---|--|--|
|  | The project is highly complex and information is included in the Stormwater Report that explains why it is not possible to submit the Construction Period Pollution Prevention and Erosion and Sedimentation Control Plan with the application. A Construction Period Pollution Prevention and Erosion and Sedimentation Control has <i>not</i> been included in the Stormwater Report but will be submitted <i>before</i> land disturbance begins. |  |  |
|  | The project is <i>not</i> covered by a NPDES Construction General Permit.   |  |  |
|  | The project is covered by a NPDES Construction General Permit and a copy of the SWPPP is in the Stormwater Report.  |  |  |
|  | The project is covered by a NPDES Construction General Permit but no SWPPP been submitted.  The SWPPP will be submitted BEFORE land disturbance begins.   |  |  |
| Standard 9: Operation and Maintenance Plan   |   |  |  |
|  | The Post Construction Operation and Maintenance Plan is included in the Stormwater Report and includes the following information:   |  |  |
|  | Name of the stormwater management system owners;  |  |  |
|  | □ Party responsible for operation and maintenance;  |  |  |
|  | Schedule for implementation of routine and non-routine maintenance tasks;   |  |  |
|  |   |  |  |
|  | ☐ Description and delineation of public safety features;  |  |  |
|  | ☐ Estimated operation and maintenance budget; and   |  |  |
|  | ○ Operation and Maintenance Log Form.   |  |  |
|  | The responsible party is <b>not</b> the owner of the parcel where the BMP is located and the Stormwater Report includes the following submissions:  |  |  |
|  | A copy of the legal instrument (deed, homeowner's association, utility trust or other legal entity) that establishes the terms of and legal responsibility for the operation and maintenance of the project site stormwater BMPs;   |  |  |
|  | A plan and easement deed that allows site access for the legal entity to operate and maintain BMP functions.  |  |  |
| Sta  | andard 10: Prohibition of Illicit Discharges  |  |  |
|  | The Long-Term Pollution Prevention Plan includes measures to prevent illicit discharges;  |  |  |
| $\boxtimes$  | An Illicit Discharge Compliance Statement is attached;  |  |  |
|  | NO Illicit Discharge Compliance Statement is attached but will be submitted <i>prior to</i> the discharge of any stormwater to post-construction BMPs.  |  |  |
