

## Winchendon Landfill Site Observation – July 28, 2022

**TO:** Brian Croteau, DPW Director  
**FROM:** Aaron Sabbs, PE, Tighe & Bond  
**COPY:** Alex Fagnand, PE, Tighe & Bond  
**DATE:** September 13, 2022

---

On July 28, 2022, Aaron Sabbs from Tighe & Bond visited the Winchendon Landfill (hereby referred to as the "Site") to monitor the grading and shaping activities of the Landfill Closure Project. The Site, which is located at 580 River Street, is the former Mabardy Landfill. It is owned and operated by W.L. French Corporation (Operator) as the Winchendon Landfill. As part of the Landfill Closure Project, the Massachusetts Department of Environmental Protection (MassDEP) has permitted the acceptance of up to 415,000 cubic yards of COMM 97-001 material as defined by MassDEP Policy. In accordance with Condition 13 of the Landfill Closure Agreement between the Town and the Operator, the Site was reviewed for compliance with the following documents:

- Corrective Action Design permit approval issued on September 23, 2020 and Corrective Action Design Plans prepared by Langdon Environmental, LLC, dated June 2019 and revised October 2019.
- Initial Operations Plan, by Langdon Environmental, LLC, dated January 2021, revised to include temporary rip rap settling area.

### Landfill Operations

General landfill operations appeared to comply with best practices and the Corrective Action Design. While on site, material was placed and spread by bulldozer in the general area of Section B-B of Sheet C-5 of the Corrective Action Design. Material had also recently been placed in the general area of Section C-C, both of which are within the limits designated for initial placement.

An upgraded scale has recently been installed adjacent to the existing scale and is now operational.

Gravel has been placed at the recently cleared area at the access road entrance to increase the width of the access road.

The Operator maintains a water truck on site for dust control. Water from a basin in the adjacent southerly site is collected and sprayed to reduce dust.

### Stormwater and Erosion

Stormwater conveyances have been constructed per the Initial Operations Plan as revised to include a temporary rip rap settling area. This plan was submitted to MassDEP under a Major Permit Modification (BWP SQ 11). A swale, including check dams, has been constructed from the temporary stormwater basin to the temporary settling area. Overflow from the temporary stormwater basin runs to the settling area with a PVC culvert running beneath the access road. The swale from the northern section of the site to the temporary stormwater basin has not yet been constructed.

Erosion control was present along the northern, southern, and western edges of the site. There were no noted deficiencies in the erosion control. A temporary swale and access road were installed at the base of the eastern slope.

The check dams within the swale have been rebuilt multiple times to slow the flow of water and capture sediment. Previous sediment buildup has been removed from the swale and temporary settling area. Additional rip rap has been added to repair the check dams.

Erosion on the southwestern slope had caused an accumulation of sediment at the base of the slope. The sediment has been removed from the haybales along the limit of work.

### **Material Accepted**

Tighe & Bond reviewed the attached Net Daily Summary Report received for the month of July, which details the total tonnage and number of loads of material received by the facility. As indicated in the attached Table 1, a total of 40,396.22 tons of material was received in July, which results in 265,762.27 tons remaining of the total 788,500 tons permitted. Based on a utilization factor of 1.9 tons per cubic yard of soil, the total volume received in July was 21,261.17 cubic yards, which results in 139,874.88 cubic yards remaining. This represents about 34% of the total permitted volume remaining.

The DEP permit limits the number of loads received to 64 per day without special Town permission. There were no days in July in which the number of loads received was greater than 64.

Enclosed are photographs summarizing the items observed during the site visit, and Table 1, which notes the monthly summary of material accepted.

August 15, 2022

James A. McQuade, Section Chief  
Solid Waste Management Program  
MassDEP Central Regional Office  
8 New Bond Street  
Worcester, Massachusetts 01606

Subject: Monthly Reporting – July 2022  
Permit No. X283688  
Former Mabardy Landfill  
River Street in Winchendon, Massachusetts  
CEC Project No: 306-000

Dear Mr. McQuade:

Civil & Environmental Consultants, Inc. (CEC) presents this letter to fulfill the monthly reporting and recordkeeping requirements at the above referenced landfill (hereby referred to as the “Site”). This submittal was prepared in accordance with Section E of the Specific Permit Conditions as described in the Permit Number X283688 (CAD permit approval) in order to document tonnage received in the past month and any operational problems or deficiencies encountered in the Project.

## **1.0 MATERIAL ACCEPTED**

W.L. French began to import approved soils for shaping and grading at the Site on January 19, 2021 in accordance with the CAD permit approval issued on September 23, 2020. A summary table showing the tonnage of material accepted at the Landfill over the previous month and cumulative yardage and tonnage of material accepted is provided with this letter. A total of 788,500 tons are permitted for the facility. As presented in the attached summary, 40,396.22 tons (21,261.17 cubic yards) was received by the facility in July 2022 which results in 265,762.27 tons (139,874.88 cubic yards) remaining.

On July 27, 2022, W.L. French notified MassDEP of the acceptance of materials between the dates of July 12 and July 13, 2022, of approximately 308 tons of soil transported to the facility from the Mill Pond Water Treatment Plant in Burlington, MA which contained arsenic concentrations up to 54 mg/kg, exceeding the COMM-97-001 limit of 40 mg/kg. W.L. French provided a letter to MassDEP on August 8, 2022 outlining the implementation of new preventative measures at the facility to prevent soil acceptance of materials greater than the COMM-97-001 Acceptance Criteria.

## 2.0 OPERATIONAL MODIFICATIONS

During the initial test pitting within the northern permitted stormwater basin footprint, groundwater elevations were detected at higher elevations than the bottom elevation of the permitted basin. Therefore, a stormwater basin redesign will be required to allow the stormwater management system to function as originally intended. A temporary basin was installed in the same general vicinity and a permanent stormwater redesign is currently being developed which will be submitted to MassDEP under a Major Permit Modification (BWP SW 11). The permanent stormwater basin design was approved for an amended Order of Conditions by the Winchendon Conservation Commission at a public hearing on June 9, 2022. The BWP SW 11 application is currently being finalized for submittal to MassDEP.

Please do not hesitate to contact either of us with any questions or comments regarding the work performed.

Sincerely,

CIVIL & ENVIRONMENTAL CONSULTANTS, INC.

Paul J. Shamoian, PE  
Project Manager

Jonathan D. Kitchen, PG, LSP  
Principal
